

Conference Announcement and First Call for Papers

The Seventh New York Fed / NYU Stern Conference on Financial Intermediation

May 4-5, 2012

A conference jointly sponsored by the Federal Reserve Bank of New York, the Salomon Center of New York University's Leonard N. Stern School of Business, and the Review of Financial Studies (RFS).

Overview

The goal of this two-day conference is to enhance the interaction among researchers interested in financial intermediation. Submissions in all areas of financial intermediation will be considered (except papers already accepted for publication).

Submission Deadline

The deadline for submissions is January 6, 2012.

Interested authors should submit a PDF version of their paper with a separate title/abstract page to salomon@stern.nyu.edu specifying "NYU/NY Fed Conference" in the subject line.

Authors who would like to have their paper considered under the RFS dual-submission process must indicate this clearly in their email. Details of the dual-submission process can be found below.

Authors of accepted papers will be notified in early March. The conference organizers will provide one night's accommodation as well as financial support for travel expenses to authors whose papers are accepted for the conference.

NY Fed/NYU Stern Conference & RFS Partnership

The NY Fed/NYU Stern Conference and the Society for Financial Studies announce a combined submission process. If you choose to, your submission to the conference will also be considered for publication by the RFS. The rules for this dual-submission process are as follows:

Authors must expressly indicate their interest in consideration by the RFS under the dual-submission process. Only papers so indicated will be considered submitted for consideration by the RFS.

In addition to being assessed for inclusion in the conference program, dual submissions will be screened separately by the program committee and the Sponsoring RFS Editor.

At the discretion of the Sponsoring Editor, a small number of dual submissions will be invited to submit to the RFS. The RFS will waive the submission fee on such submissions. Invited submissions will be subject to formal refereeing.

In the event that a dual submission that has been invited to submit to the RFS is subsequently rejected, its authors have the option to submit a future version of their paper to the RFS without prejudice.

Any paper submitted to the conference under the dual submission process must not be under review at another journal or at the RFS, nor can it be considered under the dual submission process if it has

previously been rejected by the RFS (though you are free to submit such a paper to the conference outside the dual-submission process).

While under consideration by the NY Fed/NYU Stern Conference and the RFS under the dual-submission process, a paper may not be submitted to another journal (including the RFS) until the author has been notified of the outcome of the dual-submission process.

Conference Location

New York University
Stern School of Business
44 West 4 th Street
New York NY 10012

Conference Organizers

Alexander Ljungqvist, New York University
Hamid Mehran, Federal Reserve Bank of New York
